

WILD SCIENCE

A sci-pub about exploration of the natural world

**A Tale of Two Lemurs:
stories of the fascinating
ecology and evolution of
the world's most
endangered mammals**

Join Dr. Sarah Zohdy, who has spent over a decade studying these fascinating creatures, to hear first-hand tales of the smallest primate in the world (the mouse lemur), the most endangered primate in the world (the greater bamboo lemur), and what is possibly the oddest looking creature on the planet (the aye-aye).

**Thursday
October 24th
6-8PM
