Restoration Ecology

As many native ecosystems have been altered, damaged, and even destroyed, making ecosystem restoration and management decisions has become a critical part of how we respond to land management choices. Whether you work in the area of natural resource management, forest and wildlife management, environmental sciences and consulting or environmental education, a graduate certificate in Restoration Ecology from Auburn University can complement your professional skills and generate a competitive edge to transition to other opportunities, including a master's degree.

HIGHLIGHTS

- Convenient, online courses
- Only 15 hours of coursework
- No time frame – complete at your pace
- Courses can be applied to a master's degree
- Learn from expert faculty
- Opportunity to create an e-portfolio

APPLICATION REQUIREMENTS

- Apply at grad.auburn.edu
- Official undergraduate transcripts
- 2.75 GPA - exceptions with sufficient reasoning
