# College of Forestry, Wildlife & Environment

**2024 - 2025 · MINOR · TROPICAL CONSERVATION & SUSTAINABLE DEVELOPMENT**

In this minor, students will learn about environmental conservation and sustainable agricultural production in Costa Rica. All courses will highlight issues of conservation and sustainability in tropical systems. After completion of the program, students will have a detailed understanding of the diversity of topics, methods, and approaches to the conservation of tropical natural systems and sustainable production systems. Coursework for this minor will be completed in Costa Rica.

## 15 HOURS REQUIRED FOR MINOR

CSES	3400	Sustainable Management of Tropical Soils
PARK	3630	Costa Rica Protected Area Conservation Management
NATR	3320	Ecosystem Services in Costa Rica
NATR	4250	Watershed Management in Tropical Regions
GEOG	3720	Study Abroad-Climate Change and Environment
